|------------------|---|--|
| General | As per DL test reports, there are 76/78 locations. But where as in tender we have 32 locations only. Should we assume that in remaining 46 locations which are not mentioned in tender, tests will be conducted manually and shouldn't be considered for our records. | The Project – “Development of Automated Driving Test Track Centres in the State of Punjab under PPP format” has been proposed to cover the entire State of Punjab. It is obvious that once all the Project Sites are operational then no new licenses for the categories of vehicles as stipulated in the RFP document shall be issued till the User/ Applicant undergoes driving tests on these test tracks. The above is again reconfirmed for the purpose of clarification. |
